Office Action Summary	Application No. 10/018,966	Applicant(s) HORI ET AL.	
	Examiner Karl D. Frech	Art Unit 2876	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The preliminary amendment filed 3/5/02 has been entered. Applicant has cancelled original claims 1-44 and added new claims 45-88 which applicant incorrectly renumbered as 1-44.

2. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 1-44 (as in the preliminary amendment) have been renumbered as claims 45-88.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 45-88 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barbanell 5,095,194 in view of well known prior art. Barbanell discloses a holographic credit card that uses a matched optical filter (see abstract). There is a coherent light source that may be a laser (col 3 line 60). It is disclosed that Fourier transforms are used to compare information for authentication (col 3 lines 64-68; col 5 lines 8-13). Barbanell does not disclose the display of the authentication data. However, security systems, access granting systems and pass systems which utilize displays to indicate to an official the authentication or verification of an individual card or card holder are old and well known. It would have been obvious to a person of ordinary skill in the art at the time of the invention to include a display in the system of Barbanell in order to allow for a positive view of authentication data.
6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Taniguchi 4,677,285 and Long 6,806,983 disclose holographic card systems.
